CAREER OBJECTIVE

Collaborative computer science student with fundamental knowledge of web and software development. Eager to secure an internship/work position utilizing excellent analytical and programming abilities, and my experience with building web applications.

EDUCATION

York University, *current*

B.Sc. Computer Science

Relevant Courses: Advanced Object Oriented Programming, Fundamentals of Data Structures, Design and Analysis of Algorithms, Programming for Mobile (Android), Software Tools (C & Unix)

PROJECTS

Mandir Kothar, *Food Inventory Web App* - current

- Built responsive web app using React and Node, that allows authenticated users to manage & track food inventory
- Utilized Firebase's NoSQL cloud database for CRUD operations, and Hosting to deploy and serve the web app
- Pair programmed with 4 team members, and reviewed and tested code

SpecialMedia, *Simple Social Media Web App* - 2021

- Built full-stack web app with React, Redux, and Node/Express, to allow users to interact with other users by viewing, posting, liking, and following social media posts/users
- Tested API requests/responses using Postman

SKILLS

Languages: JavaScript (React), TypeScript, HTML/CSS, Java, C, PHP, SQL/NoSQL

Frameworks: Node (Express), Laravel

Technologies: React/Redux, Firebase, MongoDB, Android, Unix, Git, Github

EXTRACURRICULARS

Hack Lassonde @ York University, *Mentor & Volunteer* (March 2019)

- Streamlined the process of registration, marketing, and logistics for 200+ Hackathon delegates
- Aided hackers with questions about their projects

BAPS, *Youth Activities & Program Coordinator* (Jan 2014 - current)

- Leading team of 5 volunteers to maintain DBMS, used to effectively analyze, model, and visualize data/statistics to track progress and outlook of youth activities
